Booth Products Description

Contracts from first-time exhibitors cannot be accepted unless accompanied by a booth products description. In addition to a hardcopy version, you must submit the description in electronic format: via e-mail by sending it to Jackie Diaz at jackied@schicago.com, or on diskette in any PC format (Macintosh format is not acceptable). **Be sure to label the diskette with your company name.**

Please submit your booth products description with your contract and deposit. It will then be included in the AACC meeting website and pre-conference promotional materials. The exhibitor list with descriptions and product locator categories will be posted beginning in January 2007. Don't miss this opportunity to have your information posted as early as possible.

Your description must be received no later than April 10, 2007 in order to be included in conference program materials. New exhibitors' contracts cannot be processed or accepted unless accompanied by their description.

Descriptions may be up to 50 words per 10' x 10' booth rented, up to a maximum of 200 words per exhibitor. Descriptions that are too long will be edited to meet the exhibitor's booth size word limit.

- One 10x10 booth qualifies for a 50-word description.
- Two 10x10 booths qualify for a 100-word description.
- Three 10x10 booths qualify for a 150-word description.
- Four or more 10x10 booths qualify for a 200-word description.

Use standard prose format—do not use bullets or upper case except for trademarked names and terms such as ARflow™, Anoxomat®, or SuperSignal®. Limit the use of upper case to accepted grammatical practices or where indicated in the instructions below. If your description does not meet these criteria, it will be returned to you for correction (time permitting before publication deadlines), or not included in program materials.

This information will be published in the Exhibit Guide, Product Locator and AACC World Wide Web Site if received by the appropriate deadlines. See the list of important dates and deadlines on the inside back cover.

This material does not have to be set up in the format indicated below the sample provides an example and the format should mimic the sample.
