

The Journal of Clinical Endocrinology & Metabolism

The Must-Read Journal for Endocrine Thought Leaders & Practitioners

The *Journal of Clinical Endocrinology & Metabolism (JCEM)* is recognized the world over as the foremost journal in clinical endocrinology. In fact, just this year, JCEM was recognized by the Special Libraries Association as one of the top 100 most influential journals in biology and medicine over the past century.

One of the top 100 most influential journals of the century.

KEY FACTS

Established: 1941

Peer Reviewed: Yes

Target Audience:
Clinical endocrinologists
and clinical scientists

Subscribers: 8,806

Frequency: Monthly

Acceptance Rate: 25%

Editor-in-Chief:
Leonard Wartofsky, MD,
Washington Hospital Center

2008 Impact Factor: 6.325,
top 4% of all biomedical
journals

5-Year Impact Factor: 6.478

Content for Clinicians

- In 2008 JCEM was enhanced to include **more content specifically for clinical practitioners**, such as more articles on diabetes and metabolic disorders, cutting-edge clinical trial reports and two regular features geared to the practicing clinician: Approach to the Patient, describing diagnosis and management of challenging cases, and Updates on the Latest Research from the previous 12 to 18 months.
- Each of the Society's Clinical Practice Guidelines is published in JCEM, providing **evidence-based guidance on conditions and disorders encountered in daily practice.**
- Other regular features include:
 - Clinical Reviews
 - Case Studies
 - Images in Endocrinology
 - Extensive Clinical Experience reports
 - Clinical Case Seminars
 - Controversies in Clinical Endocrinology

Growing Interest

- Each month JCEM is sent to **8,806 practitioners worldwide.**

Cited more than any other endocrinology & metabolism journal.

Authoritative Resource

- JCEM was cited **64,185 times in 2008**, more than any other endocrinology and metabolism journal ranked by Thomson Reuters.
- The journal's impact factor of 6.325 places it among the **top 4% of all biomedical journals** on this important measure.
- Only 25% of papers are accepted.

Broad Coverage

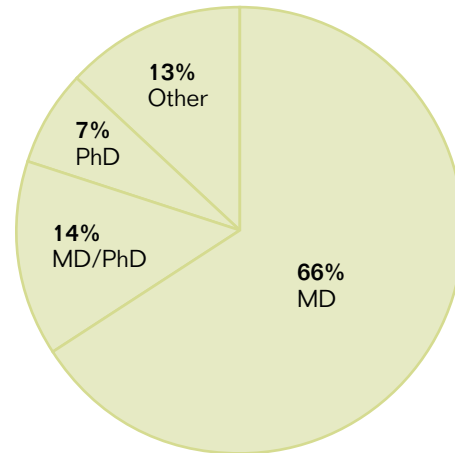

- JCEM's content covers diabetes, metabolic syndrome, obesity, reproductive endocrinology, growth hormone therapy, thyroid disorders and other critical areas of endocrinology.
- Each issue includes clinical care and original research articles, editorials and expert commentary, Society news and special features.
- Translational Highlights summarize innovative articles from The Society's research journals with implications for both clinical practice and basic research.
- Patient information from The Hormone Foundation gives clinicians a concise, easy-to-understand tool to educate their patients. Topics are wide ranging, such as use and abuse of growth hormone, bone health in children, diabetes and low blood sugar. The information is available in both English and Spanish.

Only 25% of papers accepted.

Primary Practice Settings

- **Eighty percent** of JCEM readers hold an MD or MD/PhD degree.
- **Sixty-three percent** are in private practice or work in a hospital or clinic.
